

Yemune G7 ND Purification

Yemune G7

High matching

Reverse genetic seed from Genotype VII field virus.

High protection

Early and high antibody titer.

Prevent egg drop

Effective in controlling sub-clinical ND in layers.

Purify environment

Decrease virus shedding time and quantity.

General Use Poultry Vaccine Range

Yemune G7
Inactivated Vaccine of
Recombinant Newcastle
Disease Virus (A-VII strain)

Yevac Coryza
Inactivated Vaccine of
Infectious Coryza

Yevac ND
Inactivated Vaccine of
Newcastle Disease

Yevac ND+IB
Binary Inactivated Vaccine of
Newcastle Disease and
Infectious Bronchitis

Yevac MG
Inactivated Vaccine of
Mycoplasma Gallisepticum

Yevac NBE
Triple Inactivated Vaccine of
Newcastle Disease, Infectious
Bronchitis and Egg Drop Syndrome

Yemune TF
Transfer Factor Injection
